

ENVIRONMENTAL EDUCATION PROGRAMME

The Lilongwe Wildlife Centre is a new and exciting facility created to provide sanctuary space for Malawi's rescued, confiscated and orphaned animals and help them to get back to the wild. Book a visit for your school, and our team of education professionals will introduce subjects key to the Centre's ethos through stimulating activity based workshops, including an eye-opening tour of the Wildlife Centre where you might get a chance to meet some of the animals.

Select a topic from one of our four, age-specific themes, or contact us to discuss and plan a tailor-made programme.

Appreciating Nature

(ages 4-6)

Topics within this theme get children to learn through play, looking closely at nature and building an appreciation and love of the natural world.

Choose from the following programmes:

- ~ Caring for Wild Animals
- ~ The Senses
- ~ Natural Art & Craft

Understanding Nature

(ages 6-10)

This age group can benefit from a range of sessions intending to develop their understanding of the natural world.

Choose from the following programmes:

- ~ Food Chains
- ~ Habitats
- ~ Hidden World: Camouflage

Valuing Nature

(ages 10-14)

These workshops allow students to explore the challenges facing Malawi's natural environment and develop their problem solving skills.

Choose from the following programmes:

- ~ Malawian Conservation Challenge
- ~ Food Chains & Hunting
- ~ Wildlife Identification & Survey

Protecting Nature

(ages 14 - 18)

Focusing on both local and global conservation challenges, their consequences and future solutions, this programme is best delivered when tailor-made to suit the individual groups specific curriculum needs.

Programmes are designed in conjunction with the class teacher.
